

Project Height - Work at Height Videos

Project Height was a series of 5 short videos by Safesite Ltd, presented by Angela Rippon and produced with assistance from the BIFM, HSE, RIBA and the RICS.

I wrote the script for the videos based on the court transcript from the prosecution of a property manager following the death of a contractor.

The series took viewers through an accident, from the actual fall through to the prosecution and verdict. Each video ended with an interactive CPD questionnaire for surveyors, architects and designers based on the case and the Work at Height Regulations.
